

Beach Lounge

The Beach range features ultra-comfortable pillow style cushions that attach to the perforated mesh frames by using toggles. The unique design features of this collection makes Beach a real talking point.

Maintenance

The frames of the Beach Lounge are made from Powder Coated Aluminium and can be wiped down with soapy water and a microfibre cloth. We recommend you check and tighten all hardware regularly.

The cushions are fibre filled and the filling is wrapped with a waterproof interliner, meaning they can withstand light showers. They do have a small vent in them to allow the air out so some water may get inside the cushions. Therefore if your cushions are left out in the rain, we recommend removing the covers twice a year and allowing them to dry out completely.

The Agora fabric we use on the cushions has a very high stain resistance but for stubborn stains, the covers can be removed and are machine washable at 30degrees. Once washed, we would recommend using our Fabric Shield which will add a protective layer helping repel water and prevent staining.

Waterproof covers are available to purchase to protect your cushions when not in use (FC38 Beach Lounge Cover - 6 Pack) These act like a shower cap - simply position over the cushion and tighten with the drawstring. The covers will protect your cushions all winter so you do not have to store them in a dry place.
