

Dana

Dana is our newest range, which proudly sits in our Signature collection of luxury garden furniture.

Teak furniture is often proudly bold and chunky. Yet the desire for our Dana range was to create furniture which would still benefit from the unrivalled qualities of Teak, but with a far more elegant appearance. The Dana collection is made using FSC® 100% certified Teak timbers.

Maintenance

If left untreated Dana will mellow to a beautiful silver/grey appearance. If you want to maintain the original colour we recommend applying Colour Protector annually which will enhance the appearance. Alternatively you can apply our colourless Timber Shield every 6 months.

The Dana lounge cushions use Agora fabric. The yarns on this fabric is coloured throughout meaning your cushions are more resistant to fading over time.

The fabric has a waterproof backing, so the cushions can be left out in the summer months and during light showers. Cushions covers are provided, simply place these over the cushions when not in use. Over winter we recommend storing your cushions away.
