

Pine

Our rustic Pine range offers both quality and affordability in equal measures. It's classic, familiar and functional.

This range is known for its practicality, and space-saving designs. Some of the products are made from Pine which has been sourced from responsibly managed forests in Eastern Europe. The slight yellow/green colour has been treated to make it suitable for outdoor use, all year round. In time, these products will turn an ashy silver/grey.

Our Pine is carefully sourced from responsibly managed forests in Eastern Europe.

Maintenance

Each piece has been dip treated in order to make it suitable for outdoor use. Pine must be treated annually with our Timber Sealer or a preserver such as Cuprinol or Ronseal.

Black spotting can occur through tannic acid which is present in the timber or by natural airborne spores. Should this happen to your furniture which is not unusual, it will not affect the strength, durability or quality of the wood. It's not a manufacturing defect and is purely cosmetic which can easily be removed by applying a mould remover such as Dettol or Cillit Bang. Do not use soapy water to clean black spotting. We recommend checking and tightening fixings regularly.

We have a range of furniture covers available to fit your Pine furniture.
