

# Roble

Roble provides some of the most beautiful garden furniture available in a selection of contemporary and traditional designs.

Manufactured at our own factory in Bolivia, this timber is extremely durable, has light yellow interlocking grain, and these warm natural tones blend in perfectly with any outdoor space. The impressive Roble tree grows very slowly and takes over 100 years to reach full maturity! Roble timbers are also FSC® 100% certified.

## Maintenance

If left untreated Roble will mellow to a beautiful silver/grey appearance. The Timber Protector will keep it close to Roble's original colour and add a soft gloss. Another option to enhance the natural appearance of Roble is to use our Timber Treatment followed by the Sealer; this will give the wood a darker and richer appearance.

Black spotting can occur through tannic acid which is present in the timber or by natural airborne spores. Should this happen to your furniture which is not unusual, it will not affect the strength or durability of the wood. This can easily be removed by applying a mould remover such as Dettol or Cillit Bang.

Cushions are made from 100% Olefin. These can be cleaned using warm soapy water and a cloth.

We have a range of furniture covers available to fit your Roble furniture.

Black Spotting
